

Season Electronics Ltd (SEL) - Environmental Policy

SEL is committed to minimising the impact of its activities on the environment.
The key points of its strategy to achieve this are:

- Minimise waste by evaluating operations and ensuring they are as efficient as possible.
- Minimise toxic emissions from its activities and source of its power requirement.
- Actively promote recycling internally and amongst its customers and suppliers.
- Source a product range to minimise the environmental impact on both production and distribution.
- Meet or exceed all the environmental legislation that relates to the company.

Progress

- During the course of 2016/2017 SEL stepped up efforts to recycle paper, cardboard and plastics with recycled waste going to a licensed operator.
- ISO14001 accreditation remains a long term aim as we progress
